

Tech Update Quiz for Continuing Education Units (CEUs)

Winter 2009-2010

You may qualify for up to 1 Child Passenger Safety CEU per certification cycle for reading the *Tech Update*. To qualify you must read **2 issues of the Tech Update and complete the quiz for both editions** with at least 4 out of 5 answers correct on each quiz.

NOTE: The Safe Kids online recertification system is not able to accept the .5 CEU earned by reading and answering the quiz for one issue. Keep the completed quiz for one *Tech Update* issue until you have read and completed the quiz for a second issue and then enter both at the same time in the “Newsletter/Manual/Journal Activity” category.

Unless otherwise directed to do so by the Safe Kids Worldwide Certification Program, do not mail this quiz or any other CEU materials or documentation to the Safe Kids Certification Program. Keep this document in your files. If you are audited, you must submit 2 quizzes with at least 4 out of 5 answers correct on each quiz. Quizzes will be scored by Safe Kids when submitted.

1. The instructions for the E-Z-ON Modified M203 Vest, for use in family vehicles, require all of the following except: *(circle the correct answer below)*
 - a. The child’s head be positioned as far away as possible from the vehicle door.
 - b. The child weigh at least 20 pounds using casted weight.
 - c. The small parachute label be positioned over the child’s shoulder.
 - d. The crotch strap be used.
2. TRUE or FALSE *(circle the correct answer)*: To try to prevent the possible entanglement of children in unused seat belts, General Motors, Chrysler, and Toyota recommend fastening the seat belt behind the CR before installing it with LATCH as long as the belt buckle does not interfere with the LATCH attachments.
3. To find “Seat Belt Entanglement” information on the NHTSA website, go to www.nhtsa.gov, select “Child Passenger Safety” in the blue box on the left, then click on _____.

Answer: _____

4. Which of the following answers includes the steps (in order) to a recall from a manufacturer’s perspective: *(circle the correct answer below)*
 - a. Investigating a possible defect, issuing a recall, and managing a recall.
 - b. Investigating a possible defect, containing a possible problem at the retail level, and managing a recall.
 - c. Investigating a possible defect, issuing a recall, and managing a recall.
 - d. Investigating a possible defect, containing a possible problem at the retail level, issuing a recall, and managing a recall.
5. According to Safe Ride News Publications, which of the following manufacturers allows the use of all non-designated center seating positions for LATCH installations (if the CR manufacturer permits, effective for model year 2009 vehicles)? *(circle the correct answer below)*
 - a. VW
 - b. Ford
 - c. Chevrolet
 - d. Chrysler
