

rear-facing • forward-facing • booster seat • seat belts

August 21, 2018

Acknowledgement

The National Child Passenger Safety Board acknowledges the extraordinary efforts of dedicated Certified Child Passenger Safety Technicians to make a difference in their communities protecting children and educating caregivers. While educating and supporting families in their pursuit of safety, we want to encourage technicians to refrain from recommending specific products and brands to parents and caregivers. In the National Child Passenger Safety Certification Training Curriculum, we are instructed to “never offer any personal opinions about specific car seat or booster seat products,” regardless of any discount or monetary incentive offered by any particular manufacturer. The best seat is one that:

- Fits the child’s age, size, and developmental levels.
- Fits the vehicle.
- The caregiver will use correctly each time.

Additionally, as a Certified Child Passenger Safety Technician, we are called on to follow the Code of [Conduct & Commitment](#). This includes “following all CPS certification program content in your own education and training programs.” We encourage technicians act in an ethical manner to provide respectful, professional, and technically correct education to parents and caregivers.

About the National Child Passenger Safety Board

The National Child Passenger Safety Board, managed by the National Safety Council, seeks to maintain the quality and integrity of the National Child Passenger Safety Certification Training Program. The program is used to train and certify child passenger safety technicians and instructors. For more information about child passenger safety or the National CPS Board, please visit www.cpsboard.org.
