The National Child Passenger Safety Board (NCPSB) is proud to announce the addition of Dave Sander for the 2014-2016 term as Child Restraint Manufacturer representative. Mr. Sander has worked in the toy, consumer products, automotive products, and child safety product industries for the past 16 years. Currently he is a Project Engineering Manager for Global Product Innovation at Evenflo Company, Inc., located in Miamisburg, Ohio.

Sander's interest in child passenger safety (CPS) began in 2005 while working at Evenflo on child restraint products that impact children's lives in a direct way every day. As a Child Restraint Engineer, and later a Child Passenger Safety Technician Instructor (CPST-I), he enjoys both attending CPS conferences to enhance his knowledge and educating consumers, parents, and his colleagues at Evenflo on the technical aspects of child restraints and how to use them safely. Sander is involved in Evenflo's efforts to encourage safe child restraint installation. Evenflo conducts at least 2 to 3 car seat checks at its Miamisburg facility each year. They also participate in local car seat checks at the Dayton Children's Hospital, Cincinnati Children's Hospital and AAA Miami Valley.

The mission of the National Child Passenger Safety Board is to maintain the quality and integrity of the national Child Passenger Safety Certification Training Program. This program is used to train and certify child passenger safety technicians and instructors. The Board welcomes Mr. Dave Sander as a valued addition!
