Refer to the picture below to become familiar with the parts of the child seat and five-point seat belts. This child restraint system conforms to U.S. Federal Motor Vehicle Safety Standard 213 and Canada Motor Vehicle Safety Standard No. 213.4

A. Folded Down Leg Rest Pad
B. Buckle
C. Seat Belt Latch Plates
D. Buckle Release Button
E. Shoulder Belt Adjustment Strap
F. Shoulder Belt Adjustment
G. Removable Pad

**To open the child restraint:**
Grasp the upper portion (leg rest pad) and lower the child seat cushion.

**To secure the child:**
Before placing the child in the seat, add slack to the shoulder belts. Release the seat belts by pulling up on the shoulder belt adjustment strap located at the top of the seat, then pull on the seat belts.

Place the child into the child seat, pull the shoulder belts through the appropriate shoulder slot for the height of the child and put a shoulder belt over each shoulder. Insert both seat belt latch plates into the buckle and pull up on them to make sure they are firmly latched.

*Note: Be sure that the seat belt buckle is free of foreign objects that may prevent you from properly latching latch plates. If an object is in the opening, and cannot be removed, see your dealer for service immediately.*

Fasten the two halves of the shoulder belt clip together and put it 2-3 inches below the child’s chin. The purpose of the clip is to keep the shoulder belts positioned correctly on the shoulders.

**To remove the child:**
Reverse steps 1-3.

**WARNING!**
A frayed or torn child restraint belt could rip apart in a collision and leave your child with no protection. Inspect the belt system periodically, checking for cuts, frays, or loose parts. Damaged parts must be replaced immediately. Do not disassemble or modify the system.
Child restraint belt systems must be replaced after a collision if they have been damaged (bent buckle or 5-point connector, torn webbing, etc.) Similarly, the child restraint-equipped bench or bucket seat must be replaced after a collision if it is damaged (bent or broken seat frame, etc.)
