

Frequently Asked Questions

Module 2

The CPS Technician Role

May we omit some of the activities and Learn-Practice-Explains?

The activities and Learn-Practice-Explains (LPEs) are valuable instruction tools and designed to engage the adult learner. The content of the National Child Passenger Safety Technician Certification Training must be delivered in its entirety, in modular order, and may not be altered in any way, including addition or deletion of content (*Instructor Prep Guide* page 4). The activities and LPEs are not optional and must be included as written in the curriculum.
