 - Counts of seats checked by seat type, installation location, and method
 - Age of car seats checked and their expiration status
- Vehicle Information Page
 - Counts of vehicle makes at seat checks
 - Counts of vehicle types at seat checks
 - Ages of vehicles at seat checks

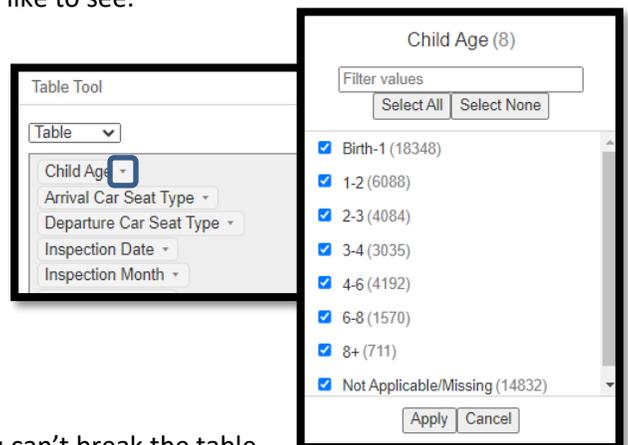

Table Tool

To customize the data you would like to see, use the table tool.

- Drag a variable/data item from the left-hand column over to the table
- Drop the variable into the box at the top or in the center

- Click on the arrow next to variable name to filter and check the categories you would like to see.

You can't break the table tool or delete any data so explore it as much as you'd like.
