National Digital Car Seat Check Form Newsletter

MARCH 2022

TIPS FROM THE FIELD

-  The NDCF can be customized with your agency liability statement in English and Spanish and the paper form can be branded with your agency logo.
-  Locked out of your NDCF account? Did you recently recertify? Follow this [Step-By-Step guide](#) to reactivate your account.
-  The NDCF app is designed to be used in areas without internet access. The data is stored within the app and can be uploaded when data connection is restored. **TOP TIP:** Place the device in airplane mode to avoid a lag or taxing the battery if the coverage is poor in your location.

UPDATES & RESOURCES

-  Minor changes have been made to the app. Visit your app store to make sure you have the latest version.
-  Agencies may request an agency login for devices used during seat check events. Email info@carseatcheckform.org for help setting up an agency account.
-  Agencies may rely on an Admin to enter seat check data from paper forms. Request Admin permissions by completing the [Administrative Account Request Form](#) under the "Agency" tab on the NDCF home page.

DIVING INTO DATA

-  The NDCF provides FREE monthly cleaned data dashboards and interactive table tools to easily sort and filter data. Dashboards and table tools are located under the "Data" tab on the [NDCF home page](#).
-  Watch the short tutorial videos found on the [National CPS Board webpage](#) and begin analyzing your data!
