

SKILLS EVALUATION 2 • SELECT AND INSTALL

Student Name _____

Date _____

Signature _____

Course ID _____

This activity must be completed individually. Stand at least 10 feet away from a station while waiting your turn. Do not talk with each other.

Instructions

1. In this evaluation, you will install and adjust car seats or booster seats for 10 scenarios.
2. **For Scenarios 1 to 4**, select and adjust the harness on the car seats based on the child's height and weight.
 - Answer scenario Sections A, B, and C per manufacturer instructions.
 - Select a different car seat (no repeats) for each scenario.
 - Be prepared to demonstrate tightening and loosening the harness for the Instructor, and explain how you adjusted the harness height.
3. **For Scenarios 5 to 10**, correctly secure the car seat or booster seat. Use the designated vehicles, seating positions, and car seats.
 - Each scenario except #10 requires a separate installation.
4. Answer ALL sections for each scenario correctly to pass.
 - You MUST pass each scenario to pass Skills Assessment 2.
 - You will have up to three attempts to pass each scenario. Instructors will sign off on each attempt.
 - If you need a third attempt to pass, stop and review your Technician Guide. A third attempt to pass must be signed off by an Instructor who has not already scored you for that scenario.
 - After each scenario, you MUST be able to tell the Instructor how you arrived at each selection.
5. Although we promote best practice, you must follow manufacturer instructions to pass.
 - For example, best practice is to keep a child rear-facing as long as possible.
 - However, if scenarios are within the height and weight limits of the car seat, the scenario is correct.

RESULTS **Pass** **Fail**

I hereby certify that the information provided above is true and accurate.
