

Hospital Tool Kit

Welcome to the Pediatric Vehicular Heatstroke (PVH) Hospital Tool Kit

Thank you for your commitment to keeping children safe. As a trusted healthcare provider, your role is critical in raising awareness and preventing pediatric vehicular heatstroke — a preventable cause of child injury and death.

This tool kit is designed to provide hospitals, clinics, and healthcare staff with easy-to-use resources to educate caregivers, volunteers, and the broader community. Here, you will find customizable materials, educational tools, and outreach resources that can be seamlessly integrated into your hospital's existing safety programs.

Inside the toolkit, you will find links to:

- [Guidance for Training Hospital Staff, Volunteers, and Caregivers on PVH Prevention.](#)
- [Sample PVH Education Hospital Policy](#)
- [Printable Posters and Infographics](#) for use at events, in public spaces, and community centers.
- [Printable Parking Lot Signs](#)
- [Printable Window Cling](#)
- [Social Media Library](#) to help amplify awareness campaigns.
 - [National Child Passenger Safety Board Social Media Library](#)
 - [Traffic Safety Marketing](#)
- [E-Learning Modules](#) to educate your networks about PVH prevention and best practices.
<https://carseateducation.org/hot-cars>
 - [How to Guide Group Delivery](#) for employers or programs wanting to track participation or make an annual requirement.
- [Customizable Email Templates](#) for outreach to your audiences, partners, and stakeholders.
- [Talking Points](#)

All resources are free, easy to download, and can be customized with your hospital's branding when appropriate.

If you would like any of these assets co-branded, please reach out to us at hotcars@nsc.org.

Together, we can work to ensure that no child is left at risk.
