

Indigenous Community Tool Kit

Welcome to the Pediatric Vehicular Heatstroke (PVH) Indigenous Community Tool Kit

Protecting children from pediatric vehicular heatstroke (PVH) starts with awareness and action. This tool kit was developed to support indigenous communities with clear, practical resources to help prevent hot car tragedies.

It includes customizable materials that can be used in health clinics, community centers, schools, and other local settings — making it easier to share life-saving messages with caregivers, families, and community members.

All resources are organized, adaptable, and ready to use. You can also submit a **PNG-formatted logo** to have it **co-branded on the materials provided** — simply email your request to hotcars@nsc.org.

- **Printable Posters and Infographics** for use at events, in public spaces, and community centers.
- **Printable Parking Lot Signs**
- **Printable Window Cling**
- **Social Media Library** to help amplify awareness campaigns.
 - **National Child Passenger Safety Board Social Media Library**
 - **Traffic Safety Marketing**
- **Children in Hot Cars E-Learning Module** to educate your networks about PVH prevention and best practices. <https://carseateducation.org/hot-cars>
 - **How to Guide Group Delivery** for employers or programs wanting to track participation or make an annual requirement.
- **Customizable Email Templates** for outreach to your audiences, partners, and stakeholders.
- **Talking Points**

All resources are free, easy to use, and can be tailored to fit your center's needs. **If you would like any of these assets co-branded, please reach out to us at hotcars@nsc.org.**

Together, we can make a powerful difference in protecting every child, every day.

Let's get started — explore the resources above to strengthen your safety efforts today.
