

Child Passenger Safety Resources: Healthcare

	Car Seat Basics for Healthcare National Training This free training provides the knowledge to help healthcare professionals take an active role in assessing car seat, booster seat and seat belt use according to evidence-based best practices. Several delivery formats are available. The self-paced online learning is 60-minutes. Coming soon: full in-person 90-minute training—online group delivery available; CSTS mini-course—online and in-person group delivery available. Contact training@cpsboard.org. cpsboard.org/trainings/car-seat-basics-health/care
	Car Seat Basics for Healthcare Quick Reference The quick reference tool, designed to be accessed in the field, provides a summary of the key information provided in the Car Seat Basics for Healthcare National Training. carseateducation.org/car-seat-basics-for-healthcare-quick-reference
	Children in Hot Cars This 10-minute, free online learning provides information about the danger of vehicular heatstroke and children, circumstances that have led to children dying and what can be done to prevent these deaths. Online group delivery available — contact training@cpsboard.org. cpsboard.org/children-in-hot-cars
	Child Passenger Safety Technician Certification Training This standardized curriculum provides in-depth training on the correct use of vehicle occupant protection systems, car seats and booster seats. Successful completion results in U.S. certification as a Child Passenger Safety Technician for two years. Fee-based. Two delivery formats are available. The in-person course is 3-4 days. The hybrid course consists of self-paced online learning, 4 virtual sessions and 1-1.5 days in-person session(s). cert.safekids.org and cpsboard.org/trainings
	Car Seat Education App The Car Seat Education app provides interactive views of car seats, highlighting each part and its specific function. Available for free download on Apple, Android and Amazon devices. Also available at cpsboard.org/3d-images.
