

National Child Passenger Safety Board Committees

Curriculum/Certification Committee

All Members serve on the Curriculum/Certification (CC) Committee. The CC Committee is co-chaired by the NSC: Curriculum Representative and the Safe Kids Worldwide: National CPS Certification Program Representative.

The CC Committee organizes the content and structure of the *Child Passenger Safety Technician Certification Training* curriculum, including the Instructor Guide, Technician Guide, PowerPoint presentations and supporting resources.

Additionally, the CC Committee works with the National CPS Certification Program to provide feedback and guidance on the policies and procedures related to certifying/recertifying Technicians, Instructors, Instructor Candidates and Technician Proxies. The committee also works with the National CPS Certification Program in handling any appeals relating to certification/recertification. The National CPS Certification Program consults with this committee, when necessary, to develop policy for specific events related to certification/recertification.

The CC Committee manages the monthly NCPSB webinar series.

Community Engagement Committee

The Community Engagement Committee is chaired by the Community Engagement Representative. The Community Engagement Committee works to build CPS community support for the Board through engagement in Board activities and amplification of Board messaging and resources. Additionally, the committee manages the National Child Passenger Safety Awards Program, CPS Coordinators Forum, Educator Forum and past Board Member meetings and gatherings.

Data Committee

The Data Committee collects and analyzes data within CPS and explores means to translate findings into tangible work that impacts both the direction of Board committees as well as informs grassroots CPS programs. Additionally, the Data Committee works with the National Digital Car Seat Check Form (NDCF) Program serving as subject matter experts.

The members of the NDCF Program Team are standing guests of the Data Committee.

Membership Committee

The Membership Committee maintains the quality and integrity of the membership application process, including but not limited to the application itself. The Membership Committee votes on the slated ballot and presents new Member candidates to the full Board for a vote. The committee may identify and recommend to NHTSA Headquarters additional membership organizations and/or constituencies to participate on the Board in an effort to ensure the mission of the Board is fulfilled. The Membership Committee is co-chaired by the Vice Chair and Vice Chair Elect.
